

INSTRUCTIONS: New Year's Photo Props

SUPPLIES

- White cardstock or other sturdy paper
- White glue, glue stick, or tape
- Scissors
- Wooden skewer

INSTRUCTIONS

1. Print & cut out the photo props onto sturdy paper; make sure to use paper strong enough to support the weight of the prop so it doesn't flop around! Be sure to cut out the "lenses" of any prop glasses and masks too.
2. Add a strip of glue to the back of the prop, near the edge but not on it, and then attach the skewer.
3. Reinforce the skewer by applying glue to two or three small strips of paper, or using 2-3 small strips of tape, and applying them across the skewer to hold it in place.
4. Once your props have dried completely, they're ready for use!
